Evening Mita
Just continue asking it's alright
Thank you for coming, ladies respectably it doesn't bother your activity
I'm Mita. I'm from Naitan, perhaps I'm going to tell you a story about what we are about to do approximately
Naitan engages in the field of market research. We're kind of curious with people, since very person is different, right? The field, the life, the income must be different. The meaning I'd like to talk a lot with you etc... Uh, because I want to know more about women, especially from Malay ethnic. You're all Malay, right?

R

So later you'll be expected to tell the truth as it is, no need to feel shame, or fear of being wrong. Nothing's wrong here. The main thing, whatever you feel... Just tell it directly... If you have different opinions, it's alright because everyone is different. As long as you don't fight... Because I am just myself and there are all of you, I can't remember what you're saying, therefore this conversation is recorded. So when it's done, the recording can be listened again... Remember what you said, so there won't be any information that missed. Alright Mita? ... And it's expected for you to talk in loud voice in order to be recorded. And I anticipate... if you bring confidence... Could you please say it out? Because the signal interferes with the record... Have you turned it off? Okay... We're going to have a relax conversation, so feel free to tell or speak... if there's anyone who'd like to go to the field... This way... Please go one person at a time.
Before we start... Perhaps it's better to introduce ourselves first so we know to whom we are talking... So I ask you to introduce yourself... What your activities are... How old you are... How many children you have and how old they are... What your activities are... Your hobby... Please... Who want to start first?
Assalamualaikum Warahmatullahi wabarakatuh...
