

A black and white photograph of a forest path. Sunlight filters through the dense canopy of tall trees, creating a bright, hazy glow at the end of the path. The trees are thin and vertical, and the ground is covered in foliage and fallen leaves.

A black and white photograph of a forest path. The path is narrow and leads into the distance, where a bright light source, likely the sun, is shining through the trees, creating a strong lens flare and illuminating the path. The trees are tall and thin, with their trunks visible on both sides of the path. The ground is covered with leaves and branches.
