MY TECHNICAL SKILLS

MY WORK EXPERIENCES

MY DESIGN SKILLS

MY EDUCATION QUALIFICATIONS

MY SOCIAL SKILL

- Versatility of Design**

During my time as an intern in LOKE digital (Melbourne, Victoria), I was tasked to work on 5 digital email designs such as a welcoming and benefits/offer email designs as a notification to alert the customers; while learning about UI/UX in general at the same time. During my time, I worked alongside with their senior designer and few of the programmers. As a result, I've learned that UI/UX design requires the knowledge of basic layouts and consumer interaction and usabilityes.
- Communication Skills**

While I was working at KEAT (Melbourne, Victoria), I designed 3 types of accounting program postcards, 1 fashion show banner and 1 accounting email design to communicate my ideas through a designer's perspective. As a result, I've managed to communicate the direction of the company, though I feel that my creativity wasn't challenged in some aspect. However, I do learned that corporate clients have a different way of thinking, which I must adjust accordingly as a designer.
- Experimental Thinking**

During my time in PPIA Victoria (Melbourne, Victoria), I was tasked to design a sports tournament poster for one of our events called 'Victoria Cup 2014'. I wanted to do something different with the execution because previous posters literally used images of athletes to explain the event's concept. As a result, I've designed a poster that conceptually describes the poster of being an actual football field. The experience that I achieved here is that I have the ability to take on conventional challenges.
- Organizational Skills**

During my time in PPIA Victoria (Melbourne Victoria), not only I was a creative design officer, I was given the responsibility to be a creative manager for one of our events. During the event, I was tasked to manage the creative team to produce good quality videos and posters to promote the event. As a result, though I have faced leadership challenges, I've learned of what it means to take responsibility as a creative design officer and head of creative team in one of the event.

MY EXTRA CURRICULAR ACTIVITIES

- JAN 2014 - OCT 2014**
PPIA VICTORIA
Creative design officer
- AUG 2014**

Volunteer for Bachelor of Communication Design
- FEB 2011 - SEPT 2011**
RMIT University Mentoring Program
Mentor
- MY INTERESTS**

WWEUFCNBAPRODUCTIONRAPTECHPHOTOGRAPHYGYMTRAVEL

MY CLOSING STATEMENT

- “I believe that design should be able to tell a story. Otherwise, why is it worth to be seen by the audience if it has no value in the design?”*
- This is my design philosophy that I always stand by with. I'm a story teller and a conceptual thinker. I believe that design should be exciting and adaptable into our modern culture. I'm a worthy candidate to your company as I always deliver a project that is 110% at best. I'm committed, hard working and always hungry for knowledge.
