RESUME SUMMARY

Latest Position	Supervisor
Years(s) of Work Experience	6 years
Latest Job Function	Software Enginer
Latest Industry Sector	Information Technology
Latest Career Level	Senior
Highest Education Attained	Diploma

EXECUTIVE SUMMARY

I like learning. Like sharks, programmers die if they stop moving. Because technology changes so fast, being a computer scientist means that "school" never stops. Even though I've been coding for years, I must constantly read programming books, follow blogs, and so on. There's no coasting!

I like play music instrument, which is very similar to programming. Both the musician and the programmer are obsessed with arts, obsessed with out of the box rules, obsessed with seeing how far they can push those rules, and obsessed with expressiveness.

i like building things which people enjoy it. It's amazing to type up some code, press a button, and suddenly hundred or even thousands of people are playing with it.

I like research, Programming tends to involve much googling and reading through documentation.

One of my favorite things about being Computer Scientist, the satisfaction of building something, and I get to learn about the kind of mistakes I make, to improve for the future.

SKILLS

Been Involved With:

Technology: E-Commerce, Online Classified, Daily Deal, Online Travel Agent, Telco System, Global Positioning System, Big Data, Payment Gateway, Online Game Payment, E-Procurement, ERP, CRM, SMS Gateway, Crawler, High Availability Server.

Programing Language: Java, PHP, Python, C++, C, Javascript, Bash.
